RESEARCH EXPERIENCE

Research Assistant at Missouri State University

02/2025 – 09/2025

Research Advisor: Dr. Michael Masterson

Remote

- Collaborated on a project analyzing political sentiment in Chinese social media as part of a broader study on political psychology and emotion.
- Coded and annotated Weibo posts using a custom multi-label framework and contributed to inter-coder reliability assessment.
- Assisted in SVM-based text classification and model evaluation using Python.

Student Research at The Shanghai Institutes for International Studies (SIIS)

Media Signaling and Bilateral Interaction in the South China Sea

07/2025 – Present

Independent Research Project

Shanghai, China

- **Web Scraping and Cleaning:** Constructing a bilingual event dataset of Vietnam–Philippines interactions (2010–2024) using news texts from VietnamPlus and PNA.
- **NLP-based Analysis:** Analyzed great-power strategic posturing and proposed China's counterbalancing approach through open multilateralism. Employing sentiment and event extraction methods to examine how media tone and frequency reflect or shape bilateral diplomatic, security, and maritime dynamics.

SKILLS

Tools: Python | R Language
Methods: Webscraper | Machine Learning
Languages: Mandarin (native) | English (TOEFL) | French (Basic)
